around the turn of the millennium it had become painfully evident that development aid charity or global business as usual were not going to be the mechanisms to alleviate global poverty today there is little dispute that poverty remains the most pressing global problem calling for innovative solutions one recent strategy is the base of the pyramid bop concept developed by prahalad and hart which relies on entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged it is a

process requiring innovations in several disciplines technological social and business this book covers a number of areas first much of the current bop discussion emphasises targeting products to the needs of the poor but do we actually know what the real needs of the poor are this book takes a bottom up human centred approach and examines examples that truly engage the poor in bop product and service development what types of needs assessment methodologies are indicated considering the cultural differences in bop countries are the existing methodologies adequate do they need to be redefined and redeveloped second the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem tragically the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages climate change or the destruction of habitats while the economic welfare of the poor is critical the bop approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability the link between the bop approach and sustainable development is a key feature of this book third it looks at innovation and asks what kinds of bottom up innovation open source technological social and business support bop initiatives and sustainable development fourth the book deals with the relationship between development assistance and bop is a bop strategy the antithesis to development aid or can these two co exist or even complement each other finally the book raises questions about the relationship between corporate responsibility and bop is bop a new form of corporate neo colonialism or a new form of corporate responsibility although the bop concept has unleashed an extensive and generally enthusiastic response from academics businesses ngos and governments the knowledge domain around this concept is still in the early stages of development this book addresses that need with a focus on the needs of the end users the poor as a starting point for bop products and innovations with contributions from both supporters and critics it provides a treasure trove of global knowledge on how the concept has developed what its successes and failures have been and what promise it holds as a long term strategy for alleviating poverty and tackling global sustainability
